Sensitive research data workflow review

Assess systems handling sensitive scientific datasets, including data movement, access, retention, and operational responsibility.

Scope of work

- Data classes and workflow boundaries
- Access and handling-control review
- Risk and evidence documentation
- Remediation recommendations for the responsible team

Workflow

01 **Set data scope**
Identify data classes, systems, purposes, and agreed review boundaries.

02 **Map data movement**
Document relevant sources, transformations, storage, and access points.

03 **Review safeguards**
Assess access, retention, validation, and operational ownership.

04 **Record risks and evidence**
Describe observed control gaps and supporting context.

05 **Recommend corrective actions**
Prioritize improvements for the teams responsible for data handling.

Applications
Biological, chemical, and other sensitive scientific data workflows.

Scope note
The review does not replace the client's legal, privacy, biosafety, or regulatory determinations.

Contributing teams
Tortzal, Science, InfraOps
